WORK EXPERIENCE

SECTOR - CYBERSECURITY

Jakarta, Indonesia

AI Research & Development Intern

Aug 2025 - Present

- Built AI automation tools to speed up penetration testing and improve cybersecurity workflows.
- Developed automated threat detection systems that identify and flag security vulnerabilities.
- Training AI models on XOps data to automate data processing, improving efficiency by 20% over manual regex-based methods.

STOCKBIT

Jakarta, Indonesia

AI Engineer Intern

Jul 2024 - Sep 2024

- Designed and implemented an OCR + AI pipeline in Python to extract and validate identity documents, improving verification accuracy to 92% and reducing approval time by 25%.
- Built scalable backend APIs in Python and Node.js to integrate the AI models into production systems with microservices architecture.
- Processed and analyzed large-scale distributed datasets in BigQuery and AWS pipelines, enhancing system scalability and model accuracy.

VR PARK

Jakarta, Indonesia

Game Developer Intern

Sep 2022 - Jan 2023

- Developed and deployed multiplayer VR systems in Unity (C#), reaching 60+ daily players across two mall locations.
- Worked with designers to optimize user interactions and gameplay mechanics for better scalability.
- Integrated VR SDK plugins and multiplayer networking to enable real-time collaborative gameplay.

PROJECTS

ASR-RUNNER

- Built a lightweight AI-powered Attack Surface Reconnaissance tool in Go and Python, integrating subfinder, httpx, and katana for automated security scanning.
- Developed automated workflows to streamline reconnaissance processes for penetration testing.
- Created comprehensive documentation and testing framework to ensure tool reliability.

JAM.AI

- Built a Node.js-based chatbot fine-tuned on 600+ medical Q&A pairs to provide personalized nutrition tips.
- Integrated large datasets from Kaggle and applied data preprocessing to simulate accurate health conversations.

SKILLS

- Programming & Systems:** C++, Python, Java, C#, Node.js, React.js, Next.js, R
- AI & Data:** TensorFlow, PyTorch, OpenAI API, Scikit-learn, SQL, RAG, Analytics
- Cloud & Infrastructure:** AWS, GCP, Docker, Vercel, CI/CD

LEADERSHIP & COMMUNITY

BC TECH CLUB

Seattle, WA

President

May 2024 - Jun 2025

- Led technical workshops and events to grow member skills and build community engagement.
- Managed the leadership team, coordinating planning, outreach, and club strategy.
- Mentored members on coding fundamentals and guided them through building their first projects.

BC HACKS 2024

Seattle, WA

Organizer

2024

- Designed and developed the official hackathon website to handle registration, schedules, and event information for 160+ participants.
- Coordinated on-site operations, managing 12 volunteers and 6 judges across 24 project submissions.
- Delivered a talk to 20+ Korean exchange students on how BC Hacks 2024 was built and organized.

EDUCATION

UNIVERSITY OF WASHINGTON

Seattle, WA

B.S. in Informatics | Minor in Business Administration

Expected 2027
